

Home Remedy for Kids

Recommended Remedy:

I'm here to help with remedies for children's health using kitchen ingredients. Do you have any aloe vera gel at home? Aloe vera gel can help soothe the pain and irritation caused by touching a thorny plant. If you have it, here's what you can do:

1. Aloe Vera Application:

- Apply a generous amount of pure aloe vera gel directly to the affected area on your son's skin.
- Gently massage the gel to help soothe the pain and reduce irritation.
- Reapply the aloe vera gel as needed to keep the area hydrated and comfortable.

If you don't have aloe vera gel, you can also use a cool compress or consult a healthcare provider for further treatment.
